	positive regulation of nervous system development negative regulation of striated muscle cell differentiation regulation of miRNA metabolic process sensory perception of mechanical stimulus
•	glomerular epithelium development negative regulation of cell growth involved in cardiac muscle cell development
	excitatory chemical synaptic transmission
	cartilage development
	regulation of miRNA transcription
	cellular response to peptide hormone stimulus
	L-glutamate import across plasma membrane
	ureter development
	intestinal epithelial cell differentiation
	positive regulation of cell cycle process
	regulation of supramolecular fiber organization
	bone development
	cochlea morphogenesis
	regulation of vascular associated smooth muscle cell migration
	positive regulation of vascular associated smooth muscle cell migration
	cellular response to nitrogen compound
	regulation of lipase activity
	anterograde trans-synaptic signaling
	cellular response to growth factor stimulus
	response to growth factor
	positive regulation of synapse assembly
	trans-synaptic signaling
	synaptic signaling
	regulation of epithelial cell proliferation
